What is the African Healthcare Challenge?

The African Healthcare Challenge is an innovation competition which aims to solve the real-life problems of African organisations and businesses. This challenge takes place over a weekend, bringing together diverse groups of smart and interesting people across the UK, and around the world.

Our aims

- Improving healthcare services, policy and infrastructure in Africa by supporting organisations to solve their challenges.
- Create meaningful networks between all of our attendees, including speakers, sponsors, and delegates.
- Creating an environment to enable creation and launch of start-ups in Africa solving healthcare challenges.

Network
with a diverse group of change makers

Work
On real challenges with real impact

Form Relationships
To create something meaningful

What makes the African Healthcare Challenge unique?

Problem Solvers Clinicians
Medics Designers Students
Developers

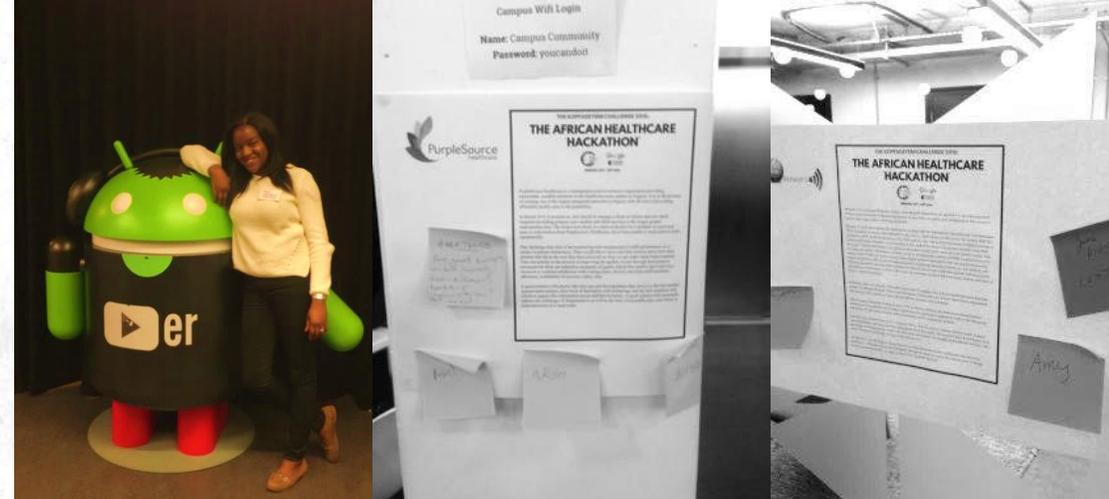

FRIDAY

SUNDAY

A weekend Challenge is not for everyone. Only the most passionate and driven make time in their busy schedules to participate and develop great ideas.

Participants are provided with well designed challenges from organisations working on the ground in Africa to improve healthcare. Throughout the weekend, teams are able to collaborate with the organisations to develop their solutions and take into account the real needs of potential users. This is often the beginning of a great working relationship which enables the teams to continue to build on their ideas beyond the weekend.

Finally, teams are supported by experts from a variety of fields and given the opportunity to attend masterclasses supporting them to work together effectively and develop long-lasting solutions.

Why engage with the African Healthcare Challenge?

Engaging with the Challenge provides an opportunity to directly and positively contribute to the growth and development of the African continent, by supporting a forum for inspiring new ideas about African Healthcare challenges.

Supporting us is a great way to get exposed to, and engage with, a highly skilled and motivated audience who are on the leading-edge of Global Health and International Development. These are the future key opinion leaders in healthcare across Africa and the UK. The networks created will be leveraged for the rest of their lives.

A number of health charities, organisations and initiatives operating across Africa do not have the resources to utilize expertise of top-class students and professionals.

We are facilitating top professionals, research experts and graduates outside Africa to sample working on healthcare challenges with people across the Continent.

We birth great and innovative ideas.

**We speak with experts to refine our policy,
business and tech solutions**

The future of Africa isn't a product or a business service. It's people.

Be part of something truly magical and revolutionary.

This programme is part of the Kopfadeyemi Fellowship.

This African Healthcare Challenge directly supports development and innovation in healthcare for the African continent. It enabled our high-calibre participants to discover and engage with a wide diversity of African healthcare opportunities in a fun and challenging environment that promotes collaboration, intelligence-sharing and innovation.

- Build networks with key African emerging leaders.
- Delivering access to Africa's most impactful opportunities in healthcare.
- Innovation incubation: Enabling global entrepreneurs to start building African solutions, even from abroad.
- Providing an eco-system which enables innovation and the discovery of global collaborators and future inventors.

Who we are

Ade Adeyemi

The Kopfadeyemi Fellowship and The African Healthcare Challenge are the brain child of Ade's. He believes the way to achieve real change in Africa's Healthcare infrastructures is by harnessing the potential of passionate people. A Senior Project Lead within the NHS in Britain, working in the Head Office of the NHS. He is also a Consulting Fellow at Chatham House where he is working on initiatives that support Ministry of Health stakeholders across Africa.

Daphne Amevenu

Daphne began her career at PwC working in consulting, later specializing in international development and programme management. She now works as a Programme Manager coordinating funding to improve UK healthcare. Daphne takes on the lead for delivering the African Healthcare Challenge aiming to continue deliver an inspiring event and develop the community infrastructure to increase the opportunity for teams to progress their ideas beyond the weekend.

Previous Sponsors

Some of our impact so far...

Global Health Café

Global health café was launched after feedback from the first and second cohorts of the African Healthcare challenge, who expressed interest in continuing the conversation around global health issues.

Regular Global Health Café meet-ups take place in at the Health Foundry, Westminster, London. Here, enthusiasts come from a wide range of backgrounds and experiences to meet and discuss Global Health issues, with a view to stimulate progressive dialogue that can inform innovation, health policy, evaluation and practice.

Doctoor.com

Doctoor is a healthcare platform integrating innovation in digital health along with physical spaces to offer users the most convenient way to look after theirs and their loved ones health.

The brain child of some of the first ever participants of The African Healthcare challenge held in 2016, including members of the winning team. They formally launched Doctoor at the end of 2016 and have since been growing, they have been part of the The Tony Elumelu Foundation 2017 incubator and were recently chosen to be part of the Make-IT Africa accelerator, an an initiative of the German Federal Ministry for Economic Cooperation and Development (BMZ).
